

SofTop™ Quik Dispenser

The Ergonomic Solution in Reagent Dispensing

- Safe, simple operation with ergonomic sure-grip design
- Maximum chemical and thermal resistance with innovative ceramic plunger
- Fast and accurate micrometer volume adjustment

The SofTop Quik Dispenser offers an exceptional “soft feel” for precision liquid handling from the creator of the world’s first ergonomic pipette. The graduated gauge offers user independent reproducible volumetric delivery. Calibrated volumetric steps assure identical volume delivery every time.

The ceramic plunger is manufactured from aluminum oxide ceramic for dimensional stability and functional safety. With a ceramic plunger, the chance of abrasions, scratching, swelling or flaking of a coating layer is completely eliminated.

The SofTop Quik Dispenser has a screw-fitted suction hose, eliminating the possibility of air bubbles during aspiration. The fully autoclavable SofTop Quik Dispenser is available in six different volumes from 0.2 mL to 60 mL. Each dispenser is individually tested and is sold with a Certificate of Quality.
